A Word About Risk: All investments are subject to risk and may lose value. Because of the risks associated with the Fund's ability to invest in loans and related instruments and mortgage-related and other asset-backed instruments, high yield securities, foreign and emerging market securities (and related exposure to foreign currencies), and the Fund's ability to use leverage, an investment in the Fund should be considered speculative and involving a high degree of risk, including the risk of a substantial loss of investment. An investment in an **interval fund** is not suitable for all investors. Unlike typical closed-end funds an interval fund's shares are not typically listed on a stock exchange. Although interval funds provide limited liquidity to investors by offering to repurchase a limited amount of shares on a periodic basis, investors should consider shares of the Fund to be an illiquid investment. Investments in interval funds are therefore subject to **liquidity risk** as an investor may not be able to sell the shares at an advantageous time or price. There is also **no secondary market** for the Fund's shares and none is expected to develop. There is no guarantee that an investor will be able to tender all or any of their requested Fund shares in a periodic repurchase offer. Please refer to the Fund's prospectus for a complete list of applicable risks.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. This and other information are contained in the fund's prospectus and summary prospectus, if available, which may be obtained by contacting your investment professional or Fund of Funds Lp representative or by visiting Fund of Funds Lp. Please read them carefully before you invest or send money.

The fund is an unlisted closed-end "interval fund." Limited liquidity is provided to shareholders only through the fund's quarterly offers to repurchase between 5% to 25% of its outstanding shares at net asset value (subject to applicable law and approval of the Board of Trustees, the Fund currently expects to offer to repurchase 5% of outstanding shares per quarter). There is no secondary market for the fund's shares and none is expected to develop. Investors should consider shares of the fund to be an illiquid investment.

It is important to note that differences exist between the fund's daily internal accounting records, the fund's financial statements prepared in accordance with U.S. GAAP, and record keeping practices under income tax regulations. It is possible that the fund may not issue a Section 19 Notice in situations where the fund's financial statements prepared later and in accordance with U.S. GAAP or the final tax character of those distributions might later report that the sources of those distributions included capital gains and/or a return of capital. Please see the fund's most recent shareholder report for more details.

Distributions may be comprised of ordinary income, net capital gains, and/or a return of capital (ROC) of your investment. Because the distribution rate may include a ROC, it should not be confused with yield or income. Please refer to the most recent Section 19 Notice, if applicable, for additional information regarding the composition of distributions. Final determination of a distribution's tax character will be made on Form 1099 DIV sent to shareholders each January.

The fund's distribution rate may be affected by numerous factors, including changes in realized and projected market returns, fund performance, and other factors. There can be no assurance that a change in market conditions or other factors will not result in a change in the fund distribution rate at a future time.
